

## **Title of Manuscript Should be a Brief Phrase Describing the Contents of the Paper**

Author1, Author2

<sup>1</sup>Author affiliation; <sup>2</sup>Author affiliation

Corresponding Author email:

### **ABSTRACT**

The Abstract should be enlightening and totally personal description, in brief present the topic, state the scope of the experiments, indicate significant data, and point out major findings and conclusions. The abstract should not exceed 350 words. Complete sentences, active verbs, and the third person should be employed, the abstract should be written in the past tense. Standard nomenclature should be used and abbreviations should be avoided.

*Keywords:* About 3 to 6 keywords should be listed that will provide indexing references and separated by semi comma.

### **1. INTRODUCTION**

The Introduction should provide a clear statement of the problem, the relevant literature on the subject, and the proposed approach or solution. It should be comprehensible to academicians around the globe of scientific disciplines. This document is a template. An electronic copy can be downloaded from the conference website. For questions on paper guidelines, please contact the publications committee as indicated on the website. Information about final paper submission is available from the website. An easy way to comply with the paper formatting requirements is to use this document as a template and simply type your text into it.

#### *1.1 Page layout*

Your paper must use a page size corresponding to A4 which is 210mm (8.27") wide and 297mm (11.69") long. The margins must be set as follows: Top = 19mm (1") Bottom = 43mm (1") Left = Right = 14.32mm (1").

Your paper must be in one column format with a space of 4.22mm (0.17") between columns. All paragraphs must be indented. All paragraphs must be justified, i.e. both left-justified and right-justified. The entire document should be in Times New Roman or Times font. Type 3 fonts must not be used. Other font types may be used if needed for special purposes. Title must be in 14 pt Bold font. Author name must be in 12 pt Regular font. Author affiliation and corresponding author must be in 9 pt Italic.

**Table I:** Table captions must be centred and in 10 pt regular font (Magnus 2016)

No.	Item	Option	Option
	Text will be the same as the article text size and font		

### 1.2 Figures and Tables

Tables should be kept to a minimum and be designed to be as simple as possible. Each table should be numbered consecutively in Arabic numerals and supplied with a heading and a legend if any. Tables included in the text. Tables should be self-explanatory without reference to the text. The details of the methods used in the experiments should preferably be described in the legend instead of in the text. The same data should not be presented in both table and graph form or repeated in the text.

Figure legends should be typed in numerical order included in the text. Graphics should be prepared using applications capable of generating high resolution GIF, TIFF, JPEG or PowerPoint before pasting in the Microsoft Word manuscript file. Tables should be prepared in Microsoft Word. Use Arabic numerals to designate figures and upper case letters for their parts (Figure 1). Begin each legend with a title and include sufficient description so that the figure is understandable without reading the text of the manuscript. Information given in legends should not be repeated in the text.

**Figure 1:** The figure should be with high quality must be centred and in 10 pt regular font.

## 2. MATERIALS AND METHODS

Materials and methods: Subheadings should be used. Methods, procedure or formula use should be complete enough to allow experiments to be reproduced. However, only authentic procedures should be described in detail; previously published procedures should be cited, and significant modifications of published procedures should be stated in brief.

### **3. RESULTS AND DISCUSSION**

Results should be presented with clearness and accuracy. The results, procedure should be written when describing the authors' analysis, theory test, investigation and experimental outcomes. Previously published results should be written as in present events. Results should be explained fundamentally with its outcomes.

The Discussion should interpret the findings in view of the results obtained in this and in past studies on this topic. State the conclusions in a few sentences at the end of the paper. The Results and Discussion sections can include subheadings, and when appropriate, both sections can be combined.

### **4. CONCLUSION**

The conclusion of a research paper needs to summarize the content and purpose of the paper.

### **5. ACKNOWLEDGMENT**

The Acknowledgments create an opportunity of appreciation of colleagues, institutions, companies, organization, grants and sponsorship. Acknowledgement should be brief.

### **6. REFERENCES**

References: In the text, a reference identified by means of an author's name should be followed by the date of the reference in parentheses e.g. John (2013), Marcos et al. (2001), (Jimme, 2013), (Hans and Ronny, 2014). When there are more than two authors, only the first author's name should be mentioned, followed by 'et al'. In the event that an author cited has had two or more works published during the same year, the reference, both in the text and in the reference list, should be identified by a lower case letter like 'a' and 'b' after the date to distinguish the works.

References should be listed at the end of the paper in alphabetical order. Articles in preparation or articles submitted for publication, unpublished observations, personal communications, should not be included in the reference list but should only be mentioned in the manuscript (e.g., Mark. K, University of Wisconsin, U.S.A). Journal names are abbreviated according to Chemical Abstracts. Authors are fully responsible for the accurate citing of the references.

#### **Examples**

Name, A. and Name, A. (2013). The Article Title. Journal Title. 1(1): 000-000.
